How we use your data. If you continue to use this website we will assume that you are happy with this. By clicking here, you confirm that you accept these terms. Please see Privacy for more details. On a device with less than 512MB of storage, the minimum required for wakeup filtering, the lock screen will default to solid. If you want to do something a little more in-depth, check out our. When you change your screen saver or lock screen to solid, you'll see a black screen for a few seconds. You can change this by going into the settings of your phone, then security. The default setting is Allow. You can choose to override this so you can see the text while you are asleep. You can choose how much time you want between sleep and wake. Download the mobile version of wakelet — a smart app that tells you when you are in danger from being woken up on your phone. Its simple interface has just one function. When activated, the screen saver will only wake up the phone once every x hours. Download the iOS or Android version of wakelet from the App Store or Google Play. Launch the app. Tap on Allow when prompted for access to personal data. Enter your wakelet password when prompted. Login to your account and follow the instructions on how to set your Sleepy Clock settings. The default option is an hour time frame before waking the phone. You can change this by going into the settings of your phone, then security. The default setting is Allow. You can choose to override this so you can see the text while you are asleep. Choose your time frame when you want the wakelet to kick in. For example, when you are about to go to sleep and your phone is on your pillow. Enter the password to authenticate the wakelet. Then switch the Sleepy Clock on. We recommend that you set your phone to only show the Wakey Wakey alarm sound. Wakelet has a handy On/Off switch, so you don't have to actually enter the password to use wake-up functionality. Sign in with your Google or Facebook account. You'll need to enable both social networks to use the app. Sign in with your Facebook or Google account. If you want to wake your phone at a particular time each day, you can do that too. Choose a wakeup time from the list 82157476af
